Subject: Conversation Follow-up

Good Morning Pete,

As a follow-up to our phone conversation this morning please note that DBA related tasks on the Niagara Fall Blvd. site can be initiated prior to completion of a Task Order Modification.

In these instances the OSC will provide technical direction via the Work Order that designates what tasks will be DBA. The FCA will enter the SCA/CLIN rate for the employee on the 1900-55 and track the estimated difference between the prosed DBA rate and CLIN as a pending until the TO Mod is complete.

Please note it is the Contractor's responsibility to submit the rate adjustments as soon as possible to minimize the amount of time that the FCA has to account for the difference in cost. The contractor must still continue to pay the employee DBA wages and maintain certified payroll receipts even if the Task Order modification has not been completed. Finally once the TO Mod is complete the FCA must adjust all DBA costs billed as SCA to include the fully loaded DBA rate.

If you have any questions regarding this matter please let me Know.

Thank you,
